

SAMMPurNA Tracking Tool, Odisha

Guidance Note

A comprehensive digital solution for tracking maternal and child health beneficiaries in high priority blocks, Odisha — empowering frontline health workers with real-time decision support.

Features: SAMMPurNA Tracking Tool

Beneficiary Tracking

End-to-end tracking for ANC, HBNC, HBYC, and PNC with complete visit history for each individual beneficiary.

Joint Visit Capture

Records joint visits by MO/CHO/ANM and ASHA together, ensuring coordinated care and accountability.

Risk Classification

Automatically classifies beneficiaries as **High Risk**, **Moderate Risk**, or **No Risk** based on recorded signs and symptoms.

Decision Support System

Provides actionable guidance — including doses, counselling subjects, referral advice, and home care — based on risk level.

Referral Management

Streamlines the referral process, ensuring timely escalation of high-risk cases to appropriate facilities.

Auto Geo-tagging

Automatically captures date, time, and geo-location at the point of service, ensuring data accuracy and accountability.

Dashboard Report

The SAMPurNA Dashboard provides near real-time visibility into programme performance at the district and block levels. Supervisors and programme managers can use the dashboard to monitor the following:

Coverage Monitoring

Track the number of ANC, HBNC, HBYC, and PNC visits conducted against targets — sub-centre and village wise.

High-Risk Beneficiary Status

Identify beneficiaries classified as high risk and monitor whether referrals and follow-ups have been completed.

Data Submission Status

View the status of forms submitted by individual health workers — including pending drafts and unsent entries — to ensure data completeness.

Worker Performance Tracking

Assess the regularity and quality of visits by ASHAs, ANMs, and other frontline workers to enable targeted supportive supervision.

TASK FOR BLOCK TEAM

- Each team member will enter 5 real HBNC-HBYC and ANC cases within next 15 days.
- Share your feedback with regard to data entry and outcome in your HPB (High Priority Block Participants) Whats-app group
